### From Snow Globes to Dust Globes?

As I try to decide what to write about this week, I find myself pulled in multiple directions as several *New York Times*' articles from the last few days filter across my desk. I will mention these in no particular order. First, I suppose it is not surprising that the spill of coal-cleaning chemicals in West Virginia didn't just go away. The telltale licorice-like smell of the chemical MCHM was detected in several schools last week, a month after the event, and a couple...[continue reading](#)

## ShowCase

### Singer Valve

Singer Valve has designed an innovative vertical diaphragm that rolls while opening and closing, enabling it to lock the valve in place without any friction. This makes for incredible pressure stability from the highest to the lowest flows, unlike that of any flat diaphragm

or  
traditional  
piston-style  
valves.
